

Conversion Manual

MAPPING OF ALL 2018-2019 BIENNIUM JOB CLASSIFICATION TITLES TO THE 2020-2021 BIENNIUM MASTER LIST

The State Auditor's Office's State Classification Team partnered with the Office of the Comptroller of Public Accounts to produce a manual to assist agencies with changes the 86th Legislature made to the State's Position Classification Plan (Plan). This manual explains the changes and the necessary payroll actions agencies must make during the end-of-year conversion process.

[Please review the Conversion Manual Guide for more information.](#)

The following legend is provided to assist agencies with interpreting the conversion manual.

Label	Description	
Occupational Category, Current Job Classification Series, Current Job Classification No., Current Salary Group, Current Job Classification Title	Lists job classification titles as approved for the 2020-2021 biennium.	
New Job Classification Series, New Job Classification No., New Salary Group, New Job Classification Title	Lists job classification recommended changes approved for the 2020-2021 biennium.	
<u>Type of Change</u> (Refers to the type of change occurring with each job classification title. In some situations, more than one change may affect a job classification title.)	<u>New Job Classification</u>	New job classification titles are added to address gaps in the current Plan, provide agencies with new titles that more clearly distinguish the work being performed that is not captured within the Plan, or create new levels in current job classification series. For example, the Payroll Specialist job classification series is new with six levels.
	<u>Reallocation</u>	Reallocations occur when a job classification title is moved to a higher or lower salary group for various reasons, including to better align the title with the average market pay and to create internal parity within the Plan with other similar jobs. For example, the salary group for Maintenance Specialist I was reallocated from A08 to A09. If the reallocation moves to a group with a lower minimum salary, no additional money may be given to the employee.
	<u>Title Change</u>	Title changes provide a better description of the functions of a job, reflect current industry terminology, create title consistency, or are made to renumber a job classification series in situations when a level was added or deleted. For example, if the Engineer I job classification title is deleted from the Engineer job classification series as recommended, the Engineer II will need to be changed to Engineer I.
	<u>Deletion</u>	Deletions occur when a job classification title is underused or not used at all, had duties that overlapped with another job classification title, or no longer provided a competitive salary. For example, Claims Assistant was deleted, because the job classification title was not used.
	<u>Salary Schedule Change</u>	Salary schedule changes occur when the job classification title is reassigned to another salary schedule to reflect the changing nature and complexity of the job. For example, the Fingerprint Analyst job classification series was reassigned from Salary Schedule A to Salary Schedule B.
	<u>Classification Number Change</u>	Classification number changes occur to ensure the Plan is properly numbered, address any numbering inconsistencies, and enhance the overall consistency and usability of the Plan.
<u>Type of Action</u> (Refers to whether the change in the payroll system will be automatic or manual.)	<u>Automatic Conversions</u>	Agencies that use the Centralized Accounting and Payroll/Personnel System (CAPPS) or the Uniform Statewide Payroll/Personnel System (USPS) do not need to manually process classification or title changes in this category. Agencies that report to the Standardized Payroll/Personnel Reporting System (SPRS), including CAPPS Hub agencies, should adhere to the reporting instructions in the Fiscal Policies and Procedures (FPP) related to SPRS conversion instructions.
	<u>Manual Conversions</u>	Agencies will need to manually code information for deletions and new job classification titles in this category. Agencies should determine the appropriate job classification title based on employees' duties and responsibilities and agencies' organizational structures. In some cases, this determination may result in an additional cost to the agency.
