PROGRAMMER I	0241	B19	\$42,244 - \$68,960
PROGRAMMER II	0242	B21	\$48,278 - \$78,953
PROGRAMMER III	0243	B23	\$55,184 - \$90,393
PROGRAMMER IV	0244	B25	\$63,104 - \$103,491
<b>PROGRAMMER V</b>	<b>0245</b>	<b>B27</b>	<b>\$76,356 - \$129,137</b>
PROGRAMMER VI	0246	B28	\$83,991 - \$142,052

## GENERAL DESCRIPTION

Performs highly advanced (senior-level) computer programming work. Work involves overseeing programming projects; analyzing proposed applications; and designing software solutions. May supervise the work of others. Works under minimal supervision, with considerable latitude for the use of initiative and independent judgment.

## EXAMPLES OF WORK PERFORMED

Oversees and/or performs work on programming projects including those that are highly complex in nature or large in scale.

Oversees and/or performs highly complex coding, testing, debugging, and implementation of applications.

Oversees and/or performs the research and the analysis required for project proposals, software and systems modifications, and new projects.

Oversees and/or analyses, designs, plans, diagrams, and verifies procedures for existing and proposed applications.

Oversees and/or develops instructions or manuals for end users.

Reviews and evaluates programming efforts in relation to systems requirements.

Provides technical advice, assistance, and recommendations in matters related to programming operations and problems.

May occasionally manage multiple programming projects.

May supervise the work of others.

Performs related work as assigned.

## **GENERAL QUALIFICATION GUIDELINES**

### **EXPERIENCE AND EDUCATION**

Experience in computer programming work. Graduation from an accredited four-year college or university with major coursework in data processing, computer science, business administration, or a related field is generally preferred. Experience and education may be substituted for one another.

### **KNOWLEDGE, SKILLS, AND ABILITIES**

Knowledge of the principles, practices, and techniques of computer programming and systems analysis; of computer operations procedures and systems; and of computer programming languages.

Skill in problem solving, in critical thinking, in programming, in the use of hardware and software, and in modifying or developing software for applications.

Ability to process information logically; to design programs and systems logic; to prepare program specifications; to code, test, and debug software; to interpret technical information related to programming and other areas of data processing; to communicate effectively; and to supervise the work of others.
