GENERAL DESCRIPTION

Performs highly advanced (senior-level) laboratory work. Work involves conducting, analyzing, and reporting laboratory testing and research. Works under limited supervision, with considerable latitude for the use of initiative and independent judgment.

EXAMPLES OF WORK PERFORMED

Coordinates screening, serological, and chemical analysis tests.

Coordinates the training of laboratory technicians.

Receives and checks in microbiological and chemical samples and specimens.

Prepares and examines smears and stains.

Analyzes the results of tests and experiments to ensure compliance with specifications, and prepares reports.

Inoculates isolation media for pathogenic microorganisms and selects colonies for studies.

Monitors experiments and reports on unusual results and malfunctions.

Performs research computations and reports errors as appropriate.

Develops methods for improving the efficiency of laboratory equipment and procedures.

Designs forms and procedures for the collection and analysis of data.

Performs related work as assigned.

Occupational Category: Medical and Health
