DESCRIPTION OF LEVELS

Note: Examples of work and descriptions are meant to progress through the levels. For example, an employee at level III may also perform work listed within the previous levels.

Factors that may distinguish between levels include the degree of independence in performing the work, the complexity of the work, the scope of responsibility, the types of equipment maintained, and the employee's related work experience, education, and certifications. Employees at the journey level may independently perform the full range of work identified and

Job Classification Series: Equipment Maintenance Technician

may assist others performing work of greater complexity. A senior level employee (levels II and III) may perform the full range of work identified in the preceding levels, may serve as a lead worker, and/or may coordinate or oversee that work for others.

EQUIPMENT MAINTENANCE TECHNICIAN I: Performs complex (journey-level) mechanical and electronic equipment repair and troubleshooting work. Works under general supervision, with limited latitude for the use of initiative and independent judgment.

EQUIPMENT MAINTENANCE TECHNICIAN II: Performs advanced (senior-level) mechanical and electronic equipment repair and troubleshooting work. Works under limited supervision, with moderate latitude for the use of initiative and independent judgment. Employees at this level may:

- Investigate complaints, document findings, and conduct quality assurance reviews.
- Perform inventory control of parts and tools.
- Order parts, materials, and equipment.
- Install engineering modifications and updates to equipment.
- Help develop policies and procedures for quality control and preventative maintenance programs.

EQUIPMENT MAINTENANCE TECHNICIAN III (Added 9-1-2023): Performs highly advanced (senior-level) mechanical and electronic equipment repair and troubleshooting work. Works under minimal supervision, with extensive latitude for the use of initiative and independent judgment. Employees at this level may:

- Oversee the installation, replacement, and maintenance of machinery and equipment.
- Develop plans and specifications for maintenance projects.
- Estimate time and materials required for projects.
- Plan long-range equipment maintenance programs.
